

LPMA Applicable Products List

The LPMA will manage all petroleum and petroleum related product packaging up to and including 15 gallons, including oil -based lubricants, grease, antifreeze, engine additives, and other fluids typically used in transportation and mechanical applications and where these containers are often comingled with oil and antifreeze containers at generator sites.

Some common types of petroleum and petroleum related containers and packaging include rigid bottles (e.g., quart, gallon, etc.), pails (e.g., five-gallon buckets), multi-layer tubes and cartridges, and bag-in-box (e.g., 3- or 5-quart fluid-filled bags inside of a cardboard box) and aerosols. Materials used in packaging contain a range of materials including, but not limited to high-density polyethylene (HDPE), polypropylene (PP), polyethylene (PE), metal, cardboard, paper, and other constituents.

The following list of included products has been developed in coordination with Circular Action Alliance (CAA) as the first part of a required Coordination Agreement.
